

PKG-SYS INC.

1519ECMC SEALER & SHRINK TUNNEL

Compact, entry-level shrink packaging system combining an L-Sealer and Shrink Tunnel on a single frame. Designed for light-duty applications, this unit uses Micro Knife sealing technology to process PVC and Polyolefin shrink films efficiently. Ideal for low-to-medium production at 8–12 packages per minute, it can package a wide range of items, including baked goods, boxes, bottles, promotional kits, and small consumer products.

Features

- Micro Knife sealing system
- Easy-load film cradle with adjustable loading tray
- Perforating pin wheel for controlled air release
- Independent seal and pulse timers
- Heavy-duty stainless steel film clamps
- Anti-jam tunnel safety system
- Digital tunnel temperature control
- Fully recirculating heated air chamber
- 2,200-watt heating system
- Variable-speed AC conveyor
- Automatic cool-down with shutoff

Specifications

- Production speed: 8–12 packages per minute
- Seal area: 15" W × 19" L
- Tunnel opening height: 6"
- Maximum film width: 22"
- Electrical: 110V, 20A, single-phase

Options

- 8" tunnel opening
- 220V / 30A power configuration
- Stainless steel product loading tray
- Teflon mesh belt kit for shrink tunnel
